

Requirement Analysis

Customer Journey Map

Date	28 June 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Persona: Ramesh, a small-scale farmer in rural Andhra Pradesh, India

Stage	Awareness	Consideration	Usage	Decision	Outcome
Action	Hears about OptiCrop from a local agricultural extension officer	Opens the OptiCrop web link on his phone	Enters his soil test values (N, P, K) and local weather data	Sees the recommended crop with confidence score and top-3 options	Decides to plant the recommended crop on his land
Thoughts	"Could this actually help me choose better?"	"Let me try it, it's free and quick"	"I hope I'm entering the right numbers"	"This matches what the local officer also suggested!"	"This saved me from guessing wrong"
Emotions	Curious	Hopeful	Slightly unsure (new technology)	Relieved and confident	Satisfied
Touchpoints	Word of mouth / local awareness camp	Streamlit web app link shared by officer	Input form on the web app	Results page showing crop + confidence	Better yield in the field
Opportunities	Promote through agricultural extension officers	Make link easy to share via QR code	Add tooltip hints explaining each input field	Show confidence score clearly with color indicators	Collect feedback to improve the model further
