Customer Problem Statement Template:

Problem Statement (PS)	I am	I'm trying to	But	Because	Which makes me feel
PS-1	a farmer growing seasonal crops in a rural region	decide which crop to grow on my land this season based on my soil and climate conditions	I don't have a reliable, data-driven way to know which crop suits my soil's Nitrogen, Phosphorus, Potassium levels, temperature, humidity, pH and rainfall	there is no easy, accessible tool that analyzes all these factors together and instantly recommends the best-suited crop for my specific land	uncertain and worried about poor yield, wasted seeds, water and fertilizer, and financial loss if I choose the wrong crop
