Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	4 Marks

Persona: Ramesh, a 40-year-old small-scale farmer in rural Andhra Pradesh, India

Empathy Map - Ramesh (Farmer Persona)

SAYS Wants reliable crop advice; worried about wrong choice	THINKS What if I waste a season? Will this tech work for me?
DOES Tests soil informally; asks neighbors/officers	FEELS Anxious about loss; hopeful for a simple tool

Category	Details
SAYS	'I don't know which crop will give me good profit this season.' 'My neighbor grew rice and lost money, I don't want the same.' 'I just go by what my father used to grow.'
THINKS	'What if I choose the wrong crop and waste a whole season?' 'I wish there was an easy way to know what suits my soil.' 'Will this new technology actually work for someone like me?'
DOES	Tests soil informally by color/texture Asks neighboring farmers or local agriculture officers Repeats the same crop every year because it feels safe
FEELS	Anxious about financial loss from wrong crop choice Frustrated with lack of reliable guidance Hopeful that a simple tool could help reduce risk
PAINS	No scientific, data-backed crop guidance easily available Limited access to agricultural experts Risk of financial loss due to wrong crop selection
GAINS (what OptiCrop gives)	Quick, simple crop recommendation based on soil and weather data Increased confidence in decision-making Better yield and reduced resource wastage
