

Project Demonstration

Project Demo Planning

Date	03 July 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating OptiCrop, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Project name, problem statement, and team introduction	1	Duddu Vijaya Padma Priya
2	Solution Overview	Explain the ML approach (Random Forest) and Streamlit architecture	1	Duddu Vijaya Padma Priya
3	Live Feature Demonstration	Enter sample soil/climate values, show crop recommendation, confidence score, and top-3 suggestions	2	Kasa Sahitya
4	Code Walkthrough	Brief explanation of app.py, train_model.py, and model.pkl	0.5	Duddu Vijaya Padma Priya

5	Q&A Session	Answer evaluator questions	0.5	Duddu Vijaya Padma Priya, Kasa Sahitya
---	-------------	----------------------------	-----	--

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Farmers often select crops based on guesswork rather than data
2	Solution Overview	OptiCrop uses a trained Random Forest model served via Streamlit
3	Live Feature Demonstration	Use a known sample (N=90, P=42, K=43, temp=20.8, humidity=82, pH=6.5, rainfall=202) which reliably predicts rice with high confidence
4	Q&A Session	Open floor for evaluator questions
